### **For Immediate Release**

### **RE: Repair The Vote PAC's Voter ID Initiative; Assigned Ballot Question Number 7**

August 9th, 2024 – Las Vegas, Nevada – Repair The Vote PAC is pleased to announce that its Voter ID initiative has been officially assigned Ballot Question Number 7 for the upcoming 2024 election. The initiative will seek that each voter in Nevada present photo identification when voting in person at polling places and, if voting by mail, requires the last four digits of their Nevada driver's license or social security number.

The assignment of Ballot Question Number 7 follows the successful submission of 185,573 signatures, significantly surpassing the required threshold to place the initiative on the ballot. This widespread public support underscores the importance of voter ID laws in preventing fraud and enhancing public confidence in election results.

“We are elated to see our Voter ID initiative officially recognized as Ballot Question Number 7,” said David Gibbs, Chairman of Repair The Vote PAC. “This is more than just a number on a ballot; it's a crucial measure to protect the sanctity and security of our elections. Our team created a grassroots movement around a simple idea, that Nevadans deserve to have trust in the process. They made it a reality and now get to share why they are voting Yes on 7!”

If passed in the 2024 election, Ballot Question Number 7 will appear again on the ballot in 2026 under the same question number. This would then meet the requirement under Article 19 of the Nevada State Constitution to make the initiative an official Constitutional amendment.

Throughout the next three months, Repair The Vote PAC plans to intensify its efforts to educate voters about the importance of the Voter ID initiative. Through community engagement, public forums, and educational campaigns, the organization aims to ensure that voters are fully informed and ready to make their voices heard on Election Day.
